السَّلَامُ عَلَيْكُمْ وَرَحْمَةُ اللَّهِ وَبَرَكَاتُهُ

Salam Sejahtera and Good Evening,

1. I would like to begin my speech tonight by saying All Praise be To Allah, Lord of the Universe, for it is His Permission that this Event Can Happen Tonight. I also would like to put on record my appreciation to PUJA (Brunei), The Institution of Surveyors, Engineers and Architect Brunei, for inviting me as their Guest of Honour for their Annual Engineers Night 2018.
2. The Platform PUJA (Brunei) has created through tonight's event has successfully gathered many of the active Engineering Consultants, their staff and the engineering Companies in Construction, Equipment, Fabrication and Materials supply and installation for them to meet each other, share their experiences, explore their opportunities and forge alliances to bring about a vibrant built environment industry here in Brunei Darussalam.
3. To the Engineering community gathered here tonight, and to those out there in Brunei Darussalam construction industry sector, I call upon you to support the initiative of The Government of His Majesty The Sultan and The Yang Di-Pertuan Negara Brunei Darussalam to implement projects with minimal cost to the Government and the Public, but with the best possible level of value engineering and adoption of world-class best practices, and with due care and diligence for public safety and the protection and the preservation of the environment. While these are very tough targets to achieve, PUJA (Brunei) can, through its CPD and training programmes assist its members and the public gain the experiences of others who have achieve some or all of the aspects I mentioned in their projects.
4. One such initiative is the delivery of public facilities and infrastructure projects through the Public Private Partnership, which has many variations and each one considered unique. The Ministry of Development

has selected this approach as the main strategic thrust of its project implementation, and welcomes the participation of PUJA (Brunei) in ensuring the approach is a win-win one for all the stake-holders especially the public. I hope it is not too much to ask, as we appreciate greatly the roles of PUJA (Brunei) and its members have played in the construction industry and in the educational spheres of engineering, architecture and quantity surveying, as well serving in the official Government Councils, Senates, Boards, Committees and Working Groups as Resource Persons and Post-bearers, such in the Board of Architects, Engineers and Quantity Surveyors (BAPEQS), the Housing Developers Board, and the various Committees under BAPEQS.

5. Again I hope this Engineers Night bring benefits to all of us here tonight and I thank again PUJA (Brunei) for inviting me tonight as the Guest of Honour.

Wabillahitaufiq Walhidayah

Wassalamu'alaikum Warrahmatullahi Wabarakatuh

Thank You
